

Andrés Contreras

Full-Stack Developer · Applied AI & Automation

I automate business processes, build AI agents and ship the software a company actually needs. I don't start from the stack I'd like to use — I start from the problem to solve. Everything listed here runs in production.

EXPERIENCE

Full-Stack Developer

Uniremington · Remington University Corporation · 2026 — present

- Migrated the institutional website from WordPress to a custom Node.js stack with no loss of content or search rankings.
- Built and launched the library system on its own subdomain.
- Shipped an AI assistant on the main site that answers student questions, built on the Claude API.
- Developed a web app that automatically replies to Facebook and Instagram comments.
- Built RemiTransfer, an internal tool for moving files of any size between campuses.

Independent Developer

Agencies in Bogotá and direct clients · 2025 — 2026

- Websites of every kind: online stores, landing pages and content sites.
- System-to-system integrations and custom automation.
- Built Scentual Bliss, a storefront running 150+ fragrances in production.

WebMaster · eCommerce Analyst

Smark7 S.A.S. · Barranquilla · 2023 — 2024 (2 years)

- Ran storefronts on WordPress, VTEX and Shopify.
- GA4 analytics, KPI reporting and A/B tests to lift conversion.
- Supported digital marketing and SEO.

PRODUCTION WORK

Uniremington Institutional site migrated to Node.js, rankings intact.

Library Library system running on its own subdomain.

Remi Student-support assistant built on the Claude API.

Social inbox App that auto-replies to Facebook and Instagram comments.

RemiTransfer Internal file transfer with no size limit.

Scentual Bliss Full storefront: catalog, checkout and transactional email.
